

**Project Design Phase-I**  
**Proposed Solution Template**

Date	19 September 2022
Team ID	PNT2022TMID48097
Project Name	Project –Real Time Communiation Using AI For Specially Abled Person
Maximum Marks	2 Marks

**Proposed Solution Template:**

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	To help the disable person through communication using AI as following ways 1)Optimal & efficient job around them. 2)Psychological guidance and mental consultation. 3)Emergency in SOS.
2.	Idea / Solution description	By calculating the disability percentage we can find the job available for them in their surrounding and by using phase recognition technique we can find the status of them.
3.	Novelty / Uniqueness	Analysing mental status and then guide them accordingly and most uniqueness is to get job alerts according to the disability percentage.
4.	Social Impact / Customer Satisfaction	Most of the disability people are not recognized by people but by getting right job they can be satisfied and recognized by people.
5.	Business Model (Revenue Model)	By using 24*7 chat bot or AI Bot calls we get generate revenue. For the service we can charge them.
6.	Scalability of the Solution	We can increase the number of users because it is working on cloud and we implement EC2.
